Email: 212myashraj@gmail.com

Mobile: +91-6206825865

SKILLS

Programming: C, C++, Java, Python, Dart.

Frameworks: Flutter, Nodejs.

Web: HTML5, CSS, REST APIs.

Databases: MySQL, MongoDB, Firebase.

Tools/Platforms: Git/Git-hub, Android studio, VS code, Cisco Packet Tracer.

Soft Skills: Team Player, Project Management, Adaptability, Analytical.

EXPERIENCE / INTERNSHIP

Navodita Infotech | Flutter Intern — Remote

March'26 – April'26

- Completed a hands-on internship focused on **Flutter and Dart-based mobile application development**.
- Designed and implemented responsive mobile application interfaces using **Flutter widgets, layouts, and reusable components**.
- Worked with **screen navigation, user interactions, forms, and UI implementation** to develop functional application screens.
- Gained practical experience in **debugging, code structuring, and mobile application development** through project-based tasks.
- Strengthened understanding of the **mobile app development lifecycle** and practical software development workflows.

CSDT IT Solution, Patna IN.

June'23 – July'23

- Developed** Python programs using variables, functions, control structures, file handling, and OOP concepts.
- Built** GUI-based mini-projects using **Tkinter** and applied practical programming concepts.
- Implemented** **MySQL and SQLite** database operations including CRUD and SQL queries.
- Integrated** Python applications with databases using **MySQL Connector**.
- Utilized** **VS Code, Python IDLE 3.12, and Tkinter** for development and debugging.

TRAINING

Lovely Professional University | Skill Development Course (SDC) — Remote

March'26 – April'26

C++ & Data Structures and Algorithms (DSA)

- Strengthened **C++ programming and OOP** fundamentals with hands-on problem-solving and STL/vector implementation.
- Implemented and practiced **Arrays, Linked Lists, Stacks, Queues, Trees, Graphs, Hashing, and Heaps**.
- Applied **Searching, Sorting, Recursion, Dynamic Programming, Greedy, Divide & Conquer, and Backtracking** techniques.
- Analysed **Time and Space Complexity (Big-O)** and selected efficient data structures and algorithms for problem-solving.

PROJECTS

BAZARIO

Technologies: Flutter (Dart), Node.js, Express.js, MongoDB, REST APIs

- Developed** a full-stack e-commerce application with a **Flutter mobile frontend** and **Node.js/Express.js backend**.
- Implemented** RESTful API integration and backend services using **Express.js and MongoDB**.
- Designed** responsive mobile interfaces and reusable Flutter components for a seamless shopping experience.
- Integrated** frontend and backend components to support scalable application functionality.
- Continuing** to enhance the application by expanding e-commerce features, improving user experience, and adding additional functionality.

SANSKRITI YATRA

Technologies: Flutter (Dart), Node.js, REST APIs, Android Studio

- Developed** a cross-platform cultural heritage application using **Flutter**, featuring information on Indian arts, languages, literature, cuisine, music, customs, and historical sites.
- Integrated** **REST APIs with a Node.js backend** to manage and display dynamic application content.
- Designed** responsive UI/UX and implemented interactive modules with intuitive navigation using Flutter.
- Presented** the project at **Science City** after selection for presentation and received a **Certificate of Participation**.
- Continuing** to enhance the application by expanding e-commerce features, improving user experience, and adding additional functionality.

DYNAMIC LECTURE ANALYZER

Technologies: React, Node.js, Express.js, MongoDB, AI APIs

- **Developed** an AI-powered web application using **React, Express.js, MongoDB, and AI APIs**.
- **Implemented** a responsive React frontend with a RESTful backend for processing and managing lecture-related data.
- **Integrated** AI-powered analysis capabilities to generate intelligent insights from lecture content.
- **Deployed** the application using **Vercel and Render** with MongoDB Atlas for cloud-based data storage.
- **Continuing** to enhance the application by expanding e-commerce features, improving user experience, and adding additional functionality.

RAILWAY RESERVATION SYSTEM

Technologies: C++, OOP, DSA, STL, File Handling

- **Developed** a CLI-based railway reservation system using **C++, OOP, and Data Structures & Algorithms**.
- **Implemented** ticket booking, cancellation, automatic seat allocation, PNR generation, and waiting-list management.
- **Applied** Vector, Array, Queue, Stack, Linear Search, Binary Search, and STL sorting for efficient data management.
- **Implemented** file handling to provide persistent storage for train and booking records.
- **Continuing** to enhance the application by expanding e-commerce features, improving user experience, and adding additional functionality.

CERTIFICATES

Knowledge Management Systems and Customer Analytics	Mar’26
Prepare Data for Exploration	Aug’25
Principles of Management	Oct’24
Introduction to Contemporary Operating Systems and Hardware	Oct’24
Introduction to the Internet of Things and Embedded Systems	Sep’24
Introduction to Hardware and Operating Systems	Jun’24
The Bits and Bytes of Computer Networking	Apr’24
Introduction to Relational Databases (RDBMS)	Mar’24
Object Oriented Programming in Java	Feb’24

CERTIFICATION

MongoDB and the Document Model	Aug’26
MongoDB Basics for Students	Aug’26

CO-CURRICULAR ACTIVITIES

OneWorld	Oct’23
NCC Certificate 'A'	Sep’22

EDUCATION

B. Tech in Computer Science Engineering Pursuing	Aug ‘2025 - Present
<i>Lovely Professional University</i> Phagwara, IN	
Diploma in Computer Science Engineering CGPA-6.73	Aug ‘2022 – 2025
<i>Lovely Professional University</i> Phagwara, IN	
Matriculation (Percentage- 67.5%)	Apr’2021-2022
<i>Govt. Boy’s Sr. Sec. School</i> Bihar IN
